CS628_01_ON: Full Stack Dev-Web Application
PE01_Irene Smith_Output
WINTER_2024
Hyperlink for PE01:

<https://improved-space-bassoon-g4qq947vwvr6hwwvw.github.dev/>

Output:

The screenshot shows a GitHub repository interface for a project named 'MyResume'. The repository is public and owned by a user named 'irenegwyneth'. It shows an initial commit with a file named 'README.md'. The README content includes the title 'MyResume' and the text 'CS628_PE01 CityU'.

Repository Header:

- Repository name: **MyResume** (Public)
- Actions: Pin, Unwatch (1)

Branch and File Information:

- Current branch: **main** (1 Branch)
- Tags: **0 Tags**
- Search: **Go to file**
- Actions: **Add file**, **Code**

Commit History:

- Commit by **irenegwyneth**: Initial commit (1f02537 · now) (1 Commit)

File List:

- README.md** (Initial commit, now)

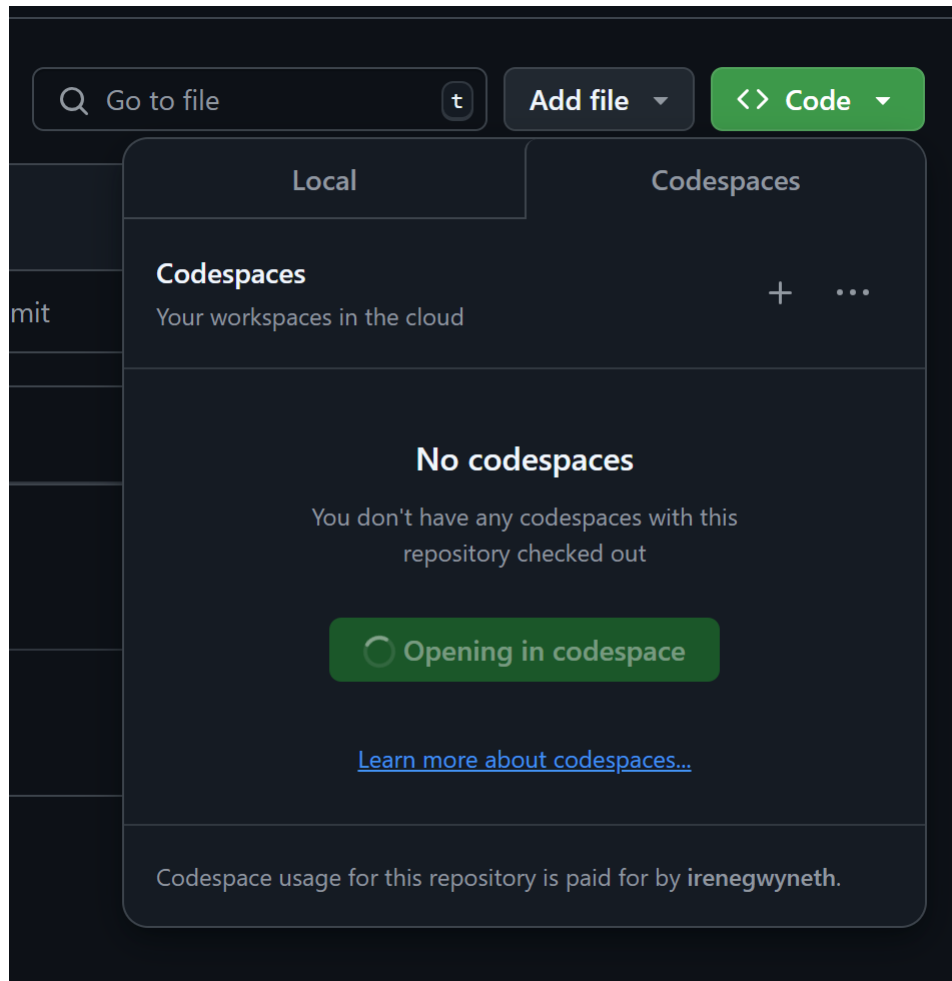

README Content:

Output:

Output:

The screenshot displays a VS Code Codespace environment. The browser address bar at the top shows the URL `improved-space-bassoon-g4qq947vwvr6hwww.github.dev`. The VS Code interface includes a sidebar on the left with the Explorer view showing a file named `README.md` under the workspace `MYRESUME [CODESPACES: IMPROVED SPACE BASS...`. The main editor area displays the content of `README.md`, which includes the title

MyResume

 and the text `CS628_PE01 CityU`. At the bottom, the TERMINAL panel is active, showing a bash shell with the following output:

```
🔥 Welcome to Codespaces! You are on our default image.
- It includes runtimes and tools for Python, Node.js, Docker, and more. See the full list here: https://aka.ms/ghcs-default-image
- Want to use a custom image instead? Learn more here: https://aka.ms/configure-codespace

💡 To explore VS Code to its fullest, search using the Command Palette (Cmd/Ctrl + Shift + P or F1).

📄 Edit away, run your app as usual, and we'll automatically make it available for you to access.

@irenegwyneth → /workspaces/MyResume (main) $
```

The bottom status bar indicates the current workspace is `Codespaces: improved space bassoon`, the active branch is `main`, and there are 0 commits, 0 warnings, and 0 errors.

Output:

The screenshot shows a VS Code editor window with a dark theme. The Explorer sidebar on the left shows a file tree for 'MYRESUME [CODESPACES: IMPROVED SPACE BASS...]'. The main editor area displays a preview of 'README.md' with the title 'MyResume' and the text 'CS628_PE01 CityU'. The bottom panel contains the 'TERMINAL' tab, which shows the output of a command. The terminal text includes instructions on using runtimes, a search tip for VS Code, and the execution of 'npx create-react-app client'. It also shows the installation of 'create-react-app@5.0.1' and a warning about 'inflight@1.0.6'.

🔍 To explore VS Code to its fullest, search using the Command Palette (Cmd/Ctrl + Shift + P or F1).

📄 Edit away, run your app as usual, and we'll automatically make it available for you to access.

@irenegwyneth → /workspaces/MyResume (main) \$ npx create-react-app client

Need to install the following packages:

create-react-app@5.0.1

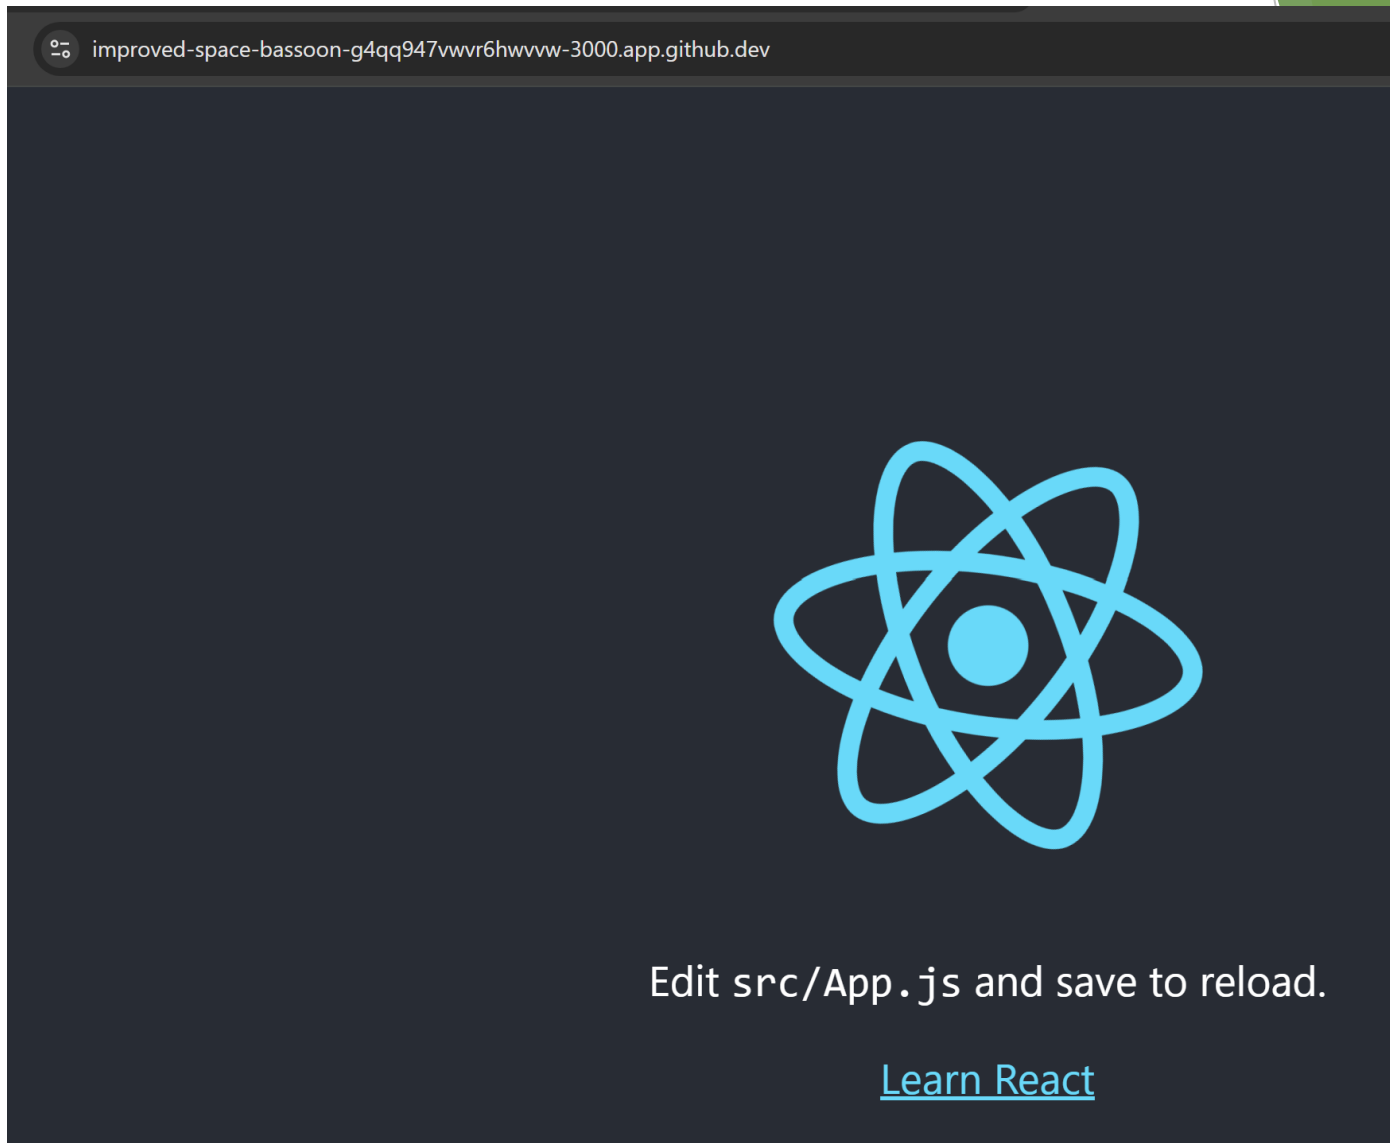

Ok to proceed? (y) y

npm warn deprecated inflight@1.0.6: This module is not supported, and leaks memory. Do not use it. Check out lru-cache if you want a good and tested way to coalesce async requests by a key value, which is much more comprehensive and powerful.

Education

Master of Science in Data Science

Seattle University WA USA | Jan 2025

GPA: 3.9/4.0

Bachelor of Science in Computer Science

University of AMA | May 2011

GPA: 3.7/4.0

Projects

Personal Website

Built a personal website using React and deployed it on GitHub Pages.

Source code: <https://github.com/studentname/personal-website>

Online Bookstore

Developed a web application for an online bookstore using Spring Boot and MySQL.

Source code: <https://github.com/studentname/online-bookstore>

Write a 150-word analysis report to explain how the program works in README.md in terms of the input-process-output model. The README.md has three level-1 headings - Input, Process, and Output.

- ▶ I designed this program to create a structured resume that doesn't require any external input during runtime. All the data, such as my name, address, contact information, educational background, and project descriptions, is pre-defined within the Resume.js file. I also included links to my GitHub repositories for project source codes to showcase my work. All these details are implemented using JSX elements, making it easy to structure and update.
- ▶ Using React, a powerful tool for building user interfaces, I organized the data into dynamic, well-structured sections like the header, education, and projects. React processes the JSX syntax, compiles it into JavaScript, and efficiently renders the content to the webpage. I styled the resume using Resume.css to ensure it looks professional and visually appealing.
- ▶ The result is a responsive and neatly formatted resume displayed as a webpage. It highlights my personal details, academic achievements, and project work, with clickable GitHub links for quick access to my code repositories.
